POSITION: Senior Java Developer (Ref: SJDMF1)

This is an urgent requirement for an US organization to be based in Chennai. They are one of the popular Healthcare organization in US. You will be on a payroll of their Indian associate and report directly to US management. Though the India office is in Chennai, other state candidates are encouraged to apply since it will be '**Work From Home**' arrangement.

Experience	5+ Years
Salary	Much higher than current CTC
Timeframe	Will be finalized ASAP
Working Time	1:30 PM to 11:00PM

Key Skills Required:

Experience	Java stack
Languages	Java, JavaScript, Ruby (optional)
Framework	Spring, React, Angular
Practices	TDD, Continuous Integration

Qualification:

- Five plus (5+) years industry experience as software engineer working on **Java, JavaScript or mobile technologies.**
- Passionate about technology and coding.
- Expertise in open source libraries /frameworks.

Who will love this job:

- **An Innovator:** who thinks outside the box to introduce new methods, ideas and products
- **A Problem solver:** passionate about using technology to solve complicated problems, and harnessing the power of data to adopt new tactics to enhance efficiency and scalability

- **A Team builder:** who enjoys recruiting and developing teams, attracting A-players from various disciplines
- **A Trusted advisor:** with strong leadership acumen who always strives to do better tomorrow than today, and continuously improve team's knowledge.
- **A Driver:** who works with purpose and passion; someone who will elevate our engineering team through new perspectives, ideas, and solutions
- **A Collaborator:** who can navigate internal departments and teams, brings people together to deliver world class products.

What you will work on:

- **Coding:** Our engineers, no matter what level, never go hands off. We think it's important to be close to the code and be involved in the code review. We work with several different technologies, mostly on the Java stack.
- **Learning:** Our engineering team is full of life-long learners. We are looking for people who have a growth mindset, stay up on their craft, and always keep an eye out for what's next. Open Source contributions and cross training opportunities are a way of life here.
- **Problem solving:** The problems we are solving are unique and complex. This takes critical thinking, root cause analysis, and issue dissection with the team to come up with the best solution.
- **Mentoring:** Teaching and coaching is an integral part of this role. We want people who want to share their experiences, best practices and knowledge to elevate the team as a whole.

If you are interested, please send your updated resume with current and expected CTC.

Cheers,

Subhashini G.
